A LONG BRANCH ROMANCE.

Won a \$5,000,000 Heiress. [Letter to the Chicago Times.] We remained. I am glad that we did, or we saw two very interesting occur-ences. One included a fresh, honest, omely girl from the Pacific slope, with native manners. She won the Adonis of the beach under the congregated sucers contest. She is the one of whom I told you at the beginning of this letter, who went into the surf for a bath. She had read names, also newspapers, and she supposed that it was nothing to do. Her father, who knows that he is unpresentable in fine society, having spent his early days in mining, and his latter ones in doubling up his money over and over again, secured for her the chaperonage a less crude family, which was naking the fashionable round of summer resorts There is a daughter in this family. She is nice enough, but not too beautiful, too accomplished, or too agreeable. It was announced by the ournal of fashionable intelligence that an heiress was in this family, and some low this reputation became misplaced HOW A BIRD FLIES. The family, who discovered the error. did not contradict it, and their daughte became the centre of devotions which

were multitudinous in complex. Indeed, t it did not mean love, it did signify business, which has cone to stand fol the same thing in a general way. The miner's daughter received what-ever of adulteration as was left over. It was offered to her as a side censer as who did not happen to be accesible to her devotees when there was a crowd o candidates for a smile. The pretty ngenue of the western slope snow why she was placed down at the side of the altar, and even if she thought of it at all she supposed it was because she did not know how to please the fashonable world. Of course she wished be worthy of admiration and she was much more lavish nature had been to ner than to the daughter of her protect she possessed she was determined to eradicate them just as soon as she knew what they were. Adonis, who is a heart a right manly fellow, and whose faults or manner are not blemishes of character, but just such little conceits a have been cultivated by the woman respected, endeavored to divert himself with the pretty girl until he should find the full effect of his fascinations when he brought them to play upon her senses The more he tried to amuse himself the more he liked it. He had never before vas kicked from under him. They had as they are found on record in the sevinote ven taken the trouble to tasten his legs, which kicked convulsively in his agony, while the ill-constructed gallows groaned. CON. MAGUIRE SAYS HE HAS. TLE VINDICATING TO D

The following appeared in an even-

COUNTY JAIL, Aug. 19, 1876. TO THE EDITOR OF THE DISPATCH:

In your local columns of yesterday's issue, in reference to the case of Mckee and myself, your reporter has evidently tallen into error as to the expiration of my term of imprisonment. I was sen-tenced April 8, and imprisoned on the 7th of May. The attorney-general has stated that the imprisonment dated from he day of entrance, viz.: April 8th. Where there is no law of credits as prevails in the jails of our state, the law of the United States provides a deduction of one month in each year, which would be fitteen days in my case, making my term of six months expire September 23. The United States laws also provide additional imprisonment for thirty days under a plea of insolvency, for the amount of my fine, \$5,000 and the costs, which, if enforced in my case, the term would expire one month later, October 23. Therefore I care very little for a pardon, sympathy, or crocodile tears. My object in seeking a pardon was to avoid imprisonment. It may be true, as you state, that the "majesty of the law has been fully vindicated," which might please a certain number of your readers, but when I again have the privilege of meeting my fellow citizens (which will be before the election) shall have a little "vindicating" to do, and I may be able to show that some of pardon, sympathy, or crocodile tears. and I may be able to show that some of our wouldbe republican leaders, engaged now in preaching moral reform, ought to have striped suits on, and with their heads shaved be serving out a term in the Missouri Penitentiary. thanks for your kind mention of my case l am, very respectfully yours,
Con. Maguire

is a faculty in which it differs from evinsects,—its power of flying. For this purpose, the bird's arm ends in only one long, slender finger, instead of a full hand. To this are attached the quills and small feathers (coverts) on the upper side, which make up the wing. Observe how light all this is: in the first place, the bones are hollow, then the shafts of the feathers are hollow, and, finally, the feathers themselves are made locking and clinging to one another with little grasping hooks of microscopic tineness. Well, how does a bird fly? It seems simple enough to describe, and yet it is a problem that the wisest in such matters have not yet worked out to everybody's satisfaction. This explanation, y the Duke of Argyle, appears to me to be the best: An open wing forms a hollow on its under side, like an invert-ed saucer; when the wing is forced down, the upward pressure of the air caught under this concavity, lifts the bird up, much as you hoist yourself up between the parallel bars in a gymnasium. But he could never in this way get ahead, and the hardest question is still to be answered. Now, the front edge of the wing, formed of the bones and muscles of the fore-arm, is rigid and unyielding, while the higher margin is merely the soft, flexible ends of the feathers; so when the wing is torced down, the air under it, finding the margin yielding the easier would rush out here, and, in so doing, would bend up the ends of the quills, pushing then ferward out of the way, which, o results in the phenomenon of fi Ernest Ingersoll, in Scribner for

A WOODCHOPPER'S AGONY. [From the Port Jervis Gazette.] Horace Miner, on Tuesday last, was stood near waiting for him to get through. She had in her arms a child a few months old. The tree in falling lurched toward Mrs. Miner, and before she could get out of the way it came crashing up-on her, one of the largest branches strikher child to the earth. Miner ran to the spot. He could not see his child, but set to work to extricate his wife and and it was evident that the child was beneath the mother. The husband, to extricate the wife and child, was com-pelled to cut away the branch, and be-fore he had finished his task he saw his wife die before his eyes. He removed found his child crushed to death, having been crushed deep into the ground. The husband, almost frantic, took both bodies
